COVID NOTE OF THE WEEK: What is the difference between isolation and quarantine?

Isolation and quarantine are public health practices used to protect the public by preventing exposure to people who have or may have a contagious disease.

- **Isolation** separates sick people with a contagious disease from people who are not sick.
- **Quarantine** separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick. These people may have been exposed to a disease and do not know it, or they may have the disease but do not show symptoms.

ADMINISTRATION UPDATES & NEWS:

NOTE: All Residents and staff tested negative for the 100% testing in August, with one contractor positive but they had no contact with either Resident or staff. In the interest of safety, we are conducting another 100% COVID testing which began on 2 Sep. We will complete testing of Residents early in the week. Flyers will be posted with details. Please remember to keep a safe distance from others, wear a face covering and wash your hands often. Fresh air is helpful, so get outside if you are able.

NOTE: Election Activity: Our country is in the middle of an important election year. As this is government property, we must abide by some rules. It is OK to have non-offensive political displays on personal property to include bumper stickers, shirts, hats, etc. You may display materials inside your room, but please refrain from posting things on the outside of your door. Our political environment evokes many emotions and we need to respect each other.

NOTE: From the Ombudsman:
